

FINANCIAL HEARINGS 20 YRS CAPITAL MARKETS DAY "The Big Portfolio Day"

SUNDAY, MARCH 17 at Operaterrassen

Program

10:00 Financial Brunch

10:30 The Financial and Industrial Future with FH 20 Years

11:30 FH Award

13:00 Financial Hearings goes to Bandy

The Nobless, Banks, Financial Fast Mowers and Outlaws ...

We divided the market at the first Capital Markets Day for almost 20 years ago, and according to a modern financial version of the old Swedish Class Parliament, with four classes from the 1800 century, actually Nobless, Priests, Freeman and Farmers. Times are still changing for the classes, but we hope you will join us and create a uniform Swedish Financial Market at a popular Swedish "Super Bowl" around the Bandy finale on Friends Arena March 17. The finale is one of the oldest sporting events in Swedish history - and indeed older than Vasaloppet. On the way there we will have time for brunch and the FH Awards ceremony at the Opera Terrace, starting at 10:00 on Sunday, 17 March.

*In general, we require the same now as then - a few hours of body and soul.
So roll up your sleeves and behave as normal "people."*

*The email you received entitles you to a place to brunch / FH Award at the Opera Terrace incl. Bandy ticket.
If you would like more tickets, contact us at hearings@financialhearings.com.*

Registration is binding and there is a limited number of seats.

Event: Operaterrassen, Stockholm
Host: financialhearings.com

Financial Hearings 20 year...

A history about Legends with Per-Erik Holmström

Financial Hearings 20 Years in operation, frames at large, the launch and development of a much more open and accessible information society in business - where speed and ease of communication has grown exponentially, both nationally and internationally. Where the social media's development in the market communication has become every man's own property.

When the Financial Hearings in March reach 20 years it has a life that is twice the original product - Finanstidningen. Why has it been so, and is the road still as straight as an arrow? The theme for the day is - a little back to the origins and maybe we get the answer. Without Finanstidningen and the support from CEO Raoul Grunthal and owner Mats Arnhög the Finanstidningen Analyst meetings not been in the game. To the supporters we also count Financial Times that helped with media support. During the Kinnevik era, Frederick Rudbäck, Michael Porseryd and Pelle Törnberg became the most loyal supporters to Financial Hearings, helping and developing us to an international reputation and reach. With Börsveckan as a partner, it was mainly with Peter Benson and Björn Davegård that we co-created the popular platform even for small companies. Today we have several such days together with several partners which might make Stockholm Corporate Finance, Life Science Day the absolute best.

We have in many ways been a leader in the development for 20 years and are proud to have been able to implement all presentations in a respectful and dignified manner for the audience, speakers and moderators. When you look at what has made the model popular, I think you all should look at names of the speaker. All together it made the presentation model the most classic of Swedish financial market. At one point - I said that - just as in a national team we would not be anything without all the "stars" when any guest interjected that I probably meant "divas" ... But I pronounce that the players or speakers are the most important participators for the game and this is really the speaker's model ... First, a big thanks to them. You can see them here and there in this album. Names like Marcus Wallenberg, Carl-Henric Svanberg, Lars Westerberg and moderators as Patrik Tillman, Hans Olov Bornemann, Bjorn Jansson, Lars Bokenberger, Raoul Grunthal and Dag Klerfelt, Lage Jonasson. Of the major Swedes in Swedish business, it is only really Mr PG Gyllenhammar that I miss of the majority of speakers passing by. Well, there are of course some of today's CEOs who are at risk of missing the chance to become immortal with us.

Finanstidningen once had a motto that was "Truth is exciting enough." We think it is still valid. "Openness and Accessibility" was a key that opened the information gap between journalists and analysts in the first step. In many ways, we led the process to the openness of websites that are now considered obvious by opening up the market.

The next important step was the creation of Webcasts that made the material available to both international investors and small savers. We were regarded as extremely arrogant when we implemented the Internet and Webcasts in the late 90's. This is illustrated by this question from a CEO. – What is this filming today? Per-Erik: Yes we do it always nowadays ... It is implied in this that if we went the traditional way to ask the customer, we probably should have started with this last in Europe. Instead we were at the front of the whole world. In six months the overhead copies were gone except for a few, such as Lars Westerberg at Autoliv, who could really patronize his audience and is a shining example that not only new media technology can do the job. Implementation time was less than 3 months without that someone had asked for the product.

Today, this is an international matter of course that is only growing in importance. For me, however, always meeting and the question time was the key and is still the most exciting part that gives the elasticity of each meeting. With the help of moderators, we see that both guarantee a certain base level of the hearing as well as that we are signaling to the audience that there is actually a transparency. In this way, we have been creating an environment that is also credible with the public. This is because basic values that sometimes could be ignored and that selective information policy could be very risky.

The Big Portfolio Sunday

Financial Hearings Capital Markets Day with FH Award Sunday, March 17, 2013 at Operaterrassen

The Capital Markets Day 2013 marks the time 20 years ago when Financial Hearings did its first meeting in The capital market. A flashback shows that over time there has become over 5,000 meetings. Financial Hearings Award has been awarded for 19 years to Sweden's best presenters. This year marks the sixth time that a jury takes the winners.

Program

10:00 Financial Brunch

10:30 The Financial and Industrial Future with FH 20 Years

11:30 FH Award

13:00 Financial Hearings goes on Bandy

Figure-skating got there first with a SM 1895, where the legendary Ulrich Salchow became one of the first champions whose legendary jumps still are within the figure skaters program. The Swedish Bandy finale is the Swedish ice and the team sport's absolute cradle and was played for the first time already in 1907. What about our ice sport and its origins - did you know that Vikings skated on animal bones around Birka? What will happen in the future with the ice? The art of skating are certainly there - but how ? - Natural ice, artificially frozen ice or plastic ice? We hope and believe that The Bandy Final in their new vintage at Friends Arena actually can become Sweden's own response to the Super Bowl.

*Registration, information, and prices and questions to hearings@financialhearings.com or 070-7704581
PS Need some accommodation - we recommend Radisson Frösundavik*

We recommend after the Award the subway from Kungsträdgården to Näckrosen, then a 10 minutes walk to the Friends Arena, where we join the program in place.

Yours sincerely

*Per-Erik Holmstrom, Johan Wallinder and Einar Brekkan
Financial Hearings*

ABOUT FH AWARD

Background presentation rates: Financial Hearings has for 20 years been an organizer of financial presentations for the capital market and has honored every year a number of prizes to the best Swedish presenters, in order to stimulate the presentation art. Presentation Art is central to everything business creation in building companies, which often precedes the presentation of capital and environments. An art as the corporate markets grows in size, both in percentage and geography. We therefore decided to boost up decision-making, for the prices, with a jury comprised of leading IR and PR consultants.

Selection and Criteria:

*The selection is all Swedish public presentations to the financial market. There are three main criteria: Continuity, Reach and Performance *. The first two are measurable and objective. The last is more subjective and judged by Financial Hearings and Jury Group. We look at all types of presenters around the capital market where the entire jury group is free to submit proposals.*

*Financial Hearings Assessment of Performance **

Presentation task weighed against the results, ie the results after the presentation. In the Financial Hearings presentation model, there are four basic types presentation times where it's about how to manage expectations and where the "aftertaste" is largely the determining factor.

- 1st High expectations of the audience where the message contains a high degree of fulfillment*
- 2nd High expectations of the audience where the message contains a low degree of fulfillment*
- 3rd Low expectations of the audience where the message contains a high degree of fulfillment*
- 4th Low expectations of the audience where the message contains a low degree of fulfillment*

Ps. This presentation model is established in the book of Investor Relations

BACK OFFICE

Vi skulle vilja ägna några rader till alla de som under åren hjälpt till med modellen. Jag börjar med alla CFOs tyvärr har vi ett stort mörkertal bland dessa i vår talarlista genom åren. Ett annat stort mörkertal är alla Informationsdirektörer och IR-Personer som hjälpt till och sätta upp alla presentationer genom åren utan dessa hade det aldrig gått. Det glädjer mig att Analytikerföreningen och IR Föreningen SIRA nu slagit samman sina påsar.

Medier och PR byråer som hjälper till med FH Award på olika sätt ser till att kvalitén band våra presentatörer håller yttersta klass:

Financial Corporate Sports - Financial Hearings and Sports

by Per-Erik Holmström

Nowadays we talk pretty quietly about corporate sport. However, there were times where it had a more central role for the companies. Who remembers that Atlas Copco had its own Ice Hockey Team until the 50th century. All along the coast of Norrland are examples of how companies has been behind the hockey development. It started mostly by funding arenas and then they recruited players by job-offers. FH has taken various part of two corporate projects. In football, we had the privilege to closely follow the team Cafe Opera which almost reached the premiership in Sweden. The Chef Per Håkansson played and was captain for a number of years. FH was also behind the initiative to the financial market's own ice hockey team, Nordic Vikings, in Asia which became China's best team ever and beat most of the records. In Asia, and especially in Japan, the entire Elite sport is structured as Corporate - causing major problems in times of crisis when the funding stops and the teams are shattered ...

Fortunately, there are other levels of Corporate sport and at the old Finanstidningen I took hold of the corporate sport and began with the classic Analysts Golf which has now existed for 20 years. The next effort was a floorball team that challenged Dagens Industri in Trygg Hansa's premises - Finanstidningen won and the shame was so great for the DI that they the year after only sent reporter Billing to give Walkover. Ecovision - now SIX - however, took over the floorball and organized the annual tournament where Financial Hearings took part and won the last championship. The Trophy now adorns my living room. Otherwise, it has been all of sporting challenges within our company. In Racket sports we are complete. In stamina sport like bike, old pro Michel Lafis actually was overtaken by the soccer player Kaj Eskelinen, Skiing - Vasaloppet and Alpine, to Running and Lidingöloppet we have done it all. We have Johan Wallinders heroic record of 7:02 in the Turning Torso race in recent memory where he took the record with over 2 minutes. Despite, we are probably most associated with team sports like Hockey and Soccer. In hockey it all started with our Capital Market, through support of Magnus Sondals initiative to Finance Hockey League, FHL, the creation of financial Hockey Team. Financial Soccer was in the news for years when we were invited to the "Classic" Thin Cup with teams RF SvFF, Sports Company and Legendary Zeros that has won 72 of 80 years. We were long haired boys in the series but has over the years spit us up and been close a few times. The echo of Finance hockey team's spread and the coordinator of Thin Cup Peter Lillis Nordquist each Exchange Broker Club Treasurer, now Chairman called one day and asked for help and our preparedness has always been favorable.

FC Café Opera - Soccer Team

Lord of Corporate Soccer team that became elite club in less than 5 years with principal owner Catenacci who created this amazing team that went all the way to the Championship. The team played four seasons in the Premier League and were in the top layer. Profiles included the Café Opera Chef and captain Pelle Håkansson, coaches Kjell Jonevret - who later took the DIF to SM Gold and Claes Eriksson - who later took BP to Allsvenskan. Kaj Eskelinen and Johan Wallinder came to the Financial Hearings by Cafe Opera. The team was sold to Väsby when AIK enlisted Sandro and sports director Peter Kisfaloudy. The wires pulled by among others UEFA President Lennart Johansson, who also was in The Main Board. Several players on the team continued in Allsvenskan for other clubs and became Swedish champions. During Financial Championships in Stockholm in 2012 were part of Cafe Opera team and formed together with a bunch of redundant financiers a B team in the Finance Championships, where the team eventually won the final after penalties against Finance Team. Team Captain was Pelle Håkansson and of course there was a Catenacci in the team.

Nordic Vikings – hockey

The story of how the Nordic Vikings, from a dream of an NHL team in Stockholm, become the whole Beijing's hockey and one of the best Asian Hockey Teams with support from the IIHF Directorate Rene Fasel, Shoichi Tomita and Jan Ake Edvinsson. Nordic Vikings consisted largely of Nordic players but in an exchange with the Chinese had to be a mix of players, developed the Chinese hockey. In series finals against Japanese Kokudo they had 7000 spectators and 100 million TV viewers. Swedish-Japanese Taro Nihei, who was one of the pioneers in Asia, also became the first Japanese in a Chinese Team and came to the FH on the road with Peter Johansson. Vikings struggled with multinational giants like Nippon Paper, Oji Paper, Kangwon, and Seibu group with extremely limited funds, but performed during an incredibly arduous season and with incredible results. The whole story can be read in the book "Hausse in Beijing" - also called Viking little red. In recent years, there have been trips to Asia with a youth team built on a mixture of Nordic players and players with Asian roots. The next generation is already under way and we hope still to be able to participate and fill the gap between Nordic and Asian Hockey.

Finance National Teams

Finance hockey teams had a decisive role where the initiative for the Financial national team came to socially connect the FHL league. Travel to Linköping and Helsinki grew to a World Tour and an Earth-Around-Traveling in less than 8 days. 2002, Swedish Stockbrokers Club asked for help to get a football team together for the European Championship in Frankfurt. We have three times won both titles, Financial Ice Hockey World Cup and Financial European Soccer Cup, in the same year - most recently in Stockholm in 2012 we became both first and second in the soccer tournament before an astonished European audience. Both the World Cup Hockey tournament and EC tournament has given a deeper insight into the various financial markets, with the seminar approach one day, and games over the weekend. There are a bunch of guys over the years which have helped to win in both sports. It is Anders Westerlund, who indeed decidedly in both sports and Christer Pihl Steel who played a leading role in both sports. Stay Westerling, Mats Hederos Johan Kleis and myself are some others who doubled. In hockey should also be mentioned Peter Mellquist, Magnus Sondal, Anders Alsing, Olle Ekman, Lars Hallstrom, Nicklas Zettergren, Nils Larsson, Owe Andersson, Angelo Morano and Tommy Gustafsson. In soccer there are heroes and personalities in as Robert Söderlund, Anders Haehnel, Johan Eriksson and Peter Nordquist as belonging to the selection committee along with the gaming heroes like Jan Moller, Johan Wallinder, Einar Brekkan Johan Qviberg, Henrik Svensson leading the new generation.

Facts about Financial national teams

The Swedish national teams is nominated by two different selection boards, which aims to balance the financial expertise, athletic level and distribution in the market. The Team is held together administratively by Financial Hearings. The Soccer Team play every year one Championships in any of Europe's market towns and the Hockey Team plays a World Cup in one of the Financial Cities. The two tournaments are operating in a similar manner where the organizer usually has an informative goal and an athletic tools to reach the target. The goal is to give the finance people of the involved teams a real insight into the organizing city from a purely financial perspective and with a sports base. The form is built on the weekend. Tournaments have been held in London, New York, Beijing, Madrid, Stuttgart, Reykjavik, Stockholm, Riga, Helsinki, Milan, Frankfurt, Gothenburg, Paris, Toronto and Zurich.

Financial Hearings 20 years and Sports

by Per-Erik Holmström

Today we will visit the Bandy Final. Friend of order will ask if I leave hockey, but do not worry - I will only take one step backwards in order to run at full speed ahead. Skating is the foundation of our culture because since the Birka epok and the Bandy Final are older than Vasaloppet as well as Swedish Soccer and Ice Hockey Championships. A step back gives a different perspective. Bandy was overtaken by hockey. The shape of the icehockey rink is now common all over the world. Today also the hockey rink - is the base even for both Curling, Figure Skating, and in recent years also Short Track. In Sweden there are about 400 ice rinks but only 5-6 Bandy halls. If we look at it from an international perspective; the difference is even larger and limits is obvious. Despite several attempts to develop the American Football outside the U.S nothing has really succeeded yet even though the Super Bowl is the American sports culture's biggest event. New Friends Arena opens opportunities to Bandy. The sport can give us a Swedish Super Bowl. But as I said - we who will gaze at a more international perspective on skating art realizes that the form needs to build on the hockey rink halls. In these halls is the team-played hockey a powerful symbol of our culture.

Some have over the years become a bit upset about our interest in hockey with the words . "What' has Hockey and IR in common ". Yes, I have a lot of opinions about hockey, but above all it is for me the link between sports and business jn the Nordics. Sometimes people mixed my role as event organizer with what I do as an individual. But let us sort things out.

My starting point for any business is to do what is fun and profitable and I think above all accomplishments of the ordinary are fun to be there. Great achievements are often performed by "people". That's where it starts for me. Within IR hockey started as a fun opportunity to meet some socially activities in a relaxed manner in the business that was relatively inexpensive to implement. When we started with these events, we were almost alone. Today, almost everyone has tried this sport in any sponsorship activity and I think it still would not be impossible to play sponsor-hockey internationally. My personal interest in the funding of the sport, as I said is my base and with it came the interest of the arenas configuration. Sailing in all the glory but you'll forgive me if I do not get high on it. Do not misunderstand me. These guys - and now it is the SCA girls - who go around the world - makes an incredible performance where they in a race all over the oceans risk their lives. Team Sport largely involves business relationships that could lead to common interests and here I have argued for - hockey. From a Nordic perspective the opportunities is in a more practical manner and in Asia especially. There is opportunities that we with our "know-how" can help the sport development with, which could be a good support to the economy. A completely different track was to catch on to the NHL to create relationships with all American cities. This is a sport where we have traditionally been on a very high minimum level and we have to maintain despite the international competition increases. It is also difficult to copy - ask the Chinese they know .. I think this would give many of our export industries a very cheap and important distribution channel as well as something fun to talk about with customers in those countries. But as I said everyone must be openminded before it really happens...

Another important part of this is the use of players, old stars and new, as a resource to fill stadiums. I believe also the old players can help. After a lot of work with a Legends Album, which gave a very good view of the skills of hockey in Sweden, I had the opportunity to do 'The Honoring of Sven Tumba in Tumba ". My squire in the project Ronnie Glysing said: "One should honor the people before they die." On the sporting side this was the start of several events in the Legends area. Legends is also a skill that we must learn to exploit better, but it is a completely different track. If you read this album you will find a completely incredible amount of expertise - where we start with the class party ...

In the job with Financial Hearings, I experience the feeling of excellence every day when I meet people who will speak. Winners or losers is usually measured in the stock price - up or down, but only from a promoter, supervisor or judgments view. For me however the dressing room or backstage has always been a holy place. It starts with that longing for the event and ends in the joy or disappointment afterwards. Finally - I would like to thank the guys in the Financial National Teams, Hockey and Soccer. I have had the privilege to work with friends in the Capital Market with corporate sport at the highest international level as Head of the Financial National Teams in both Soccer and Hockey. We have had many successful days together where we have become World champions and European champions several times and even the same year.

Referring to above it is not so bad to advertise for our "pond of ducks" by sport events, so that's why I have spent the last pages of this album for Corporate Sport...
